

# iSHIELD™ RADIATION PROTECTION CHIP RESEARCH

## iSHIELD IS A TRUE “RADIATION BIO-HARMONIZER”™

All Chips are uniquely and powerfully programmed to perform two very important functions.

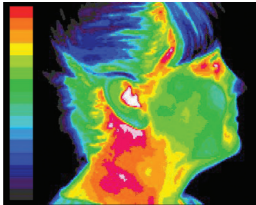

1. iShield Chips reprogram and transform all biologically harmful and dangerous aspects of cellphone radiation and EMF's into a wave form that is biologically compatible with your body, and therefore harmless.
2. iShield Chips also have the unique ability to dramatically strengthen your body's energetic system, as proven by many testings with the FDA registered BioMeridian MSAS test equipment. This profound energetic strengthening helps your body resist all kinds of stress and is a vital key to your overall health and well-being.

## FDA Registered Biomeridian Testing

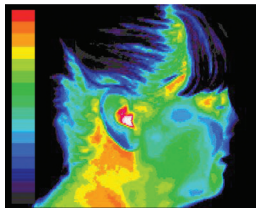

## Comprehensive and successful scientific testing has proven how iSHIELD protects you from harmful phone radiation and all EMF's.

WITHOUT iSHIELD

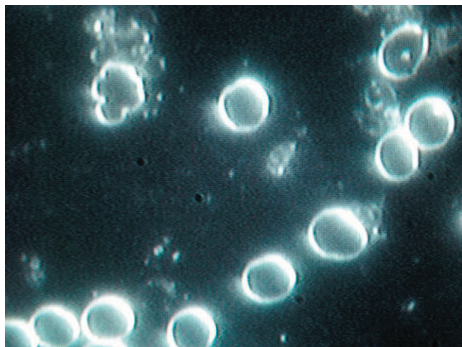

Only 15 min. on a cellphone or your cordless phone **without the iSHIELD Chip** results in significant dangerous heating of your head and brain! Also many harmful non-thermal biological effects are happening from the radiation.

WITH iSHIELD

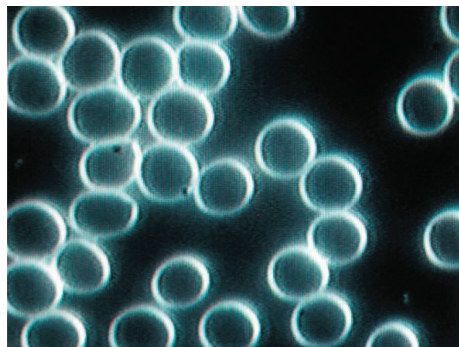

15 min or more on a cell phone with the **iSHIELD Chip** attached and your head remains its normal safe temperature, proving the true effectiveness of **iSHIELD NVT** (Nano Vibrational Technology) to neutralize harmful phone radiations and protect your health.\*

## Human Cellular Study - Before and After Using iShield Chip

This image is a test subject's blood **after only a 5 minute cell phone call**. The state of the red blood cells clearly show a dramatic and harmful stress response. **Blood cells in this state severely compromise your health and energy levels.**

This image is **after a 5 minute cell phone call with the iSHIELD Chip applied on the phone**. There is now no negative cellular response and the cells are in a very healthy state. In fact, the use of the **iSHIELD chip** has shown to increase the overall health of the blood.\*

\*This demonstration of protection coincides with results for protection from all electrical devices where iShield Cell Phone Chips, iShield Multipurpose Chips and iShield Bluetooth Chips are applied.
